

1. Personal Information				
First Name		Last Name		
Md. Shakil		Uddin Rony		
DOB (yyyy-mm-dd)	Nationality	Marital Status	Gender	
1981-06-05	Bangladesh	Singal	Male	
Contact Me: - 01714130954, 01973045780 Email :- shakil.uddin@gmail.com				Photograph
2. Educational Background				
School Name	Duration	Department	Major etc.	
Address of Institute	(yyyy) - (yyyy)			
O Level	1995-1996	Science		
A Level	1996-1997	Science		
NCC (International Diploma in Computer Studies)	2000-2001	Computer Science	Computer Science	
America Bangladesh University	2001-2005	Computer Science	B.Sc. in Computer Science and Engineering	
New Horizon	2022-2022		Project Management Professional (PMP)	
3. Strengths				
- Orchestrated the entire system architecture for Nagad, leveraging machine learning with PyTorch and TensorFlow to significantly enhance digital transaction capabilities and user experience, including predictive analytics for user behavior and advanced fraud detection systems. - Engineered a sophisticated fraud detection mechanism using generative AI and machine learning algorithms, substantially reducing risk and fortifying system integrity across financial operations. This involved utilizing PyTorch and TensorFlow for developing robust, adaptive models capable of identifying and learning from fraudulent patterns effectively. - Led the design of Jadroo's e-commerce platform, integrating machine learning algorithms for personalized customer engagement, product recommendation systems, and operational efficiency through predictive inventory management. - Developed a machine learning-driven predictive analysis system for Deshi Farmers, using land and climate data to accurately forecast vegetable pricing and market trends, thereby enhancing agricultural decision-making. - Created an advanced vehicle identification system for Dubai Police, employing deep learning techniques to accurately identify cars involved in police cases, significantly improving traffic management and public safety. - Directed the Dubai Mall automation project, incorporating AI and machine learning to optimize operations, personalize visitor experiences, and manage facilities through predictive maintenance and crowd management algorithms. - Spearheaded the complete system overhaul for Swap with a focus on machine learning, enhancing platform efficiency, scalability, and user engagement through intelligent data analysis and automated processes. - Executed a Tank Simulation project for the Bangladesh Army, incorporating machine learning algorithms to create highly realistic and adaptive training environments, thereby advancing military training with technology-driven simulations. - Designed and implemented an AI chatbot for Omicon Group, utilizing generative AI to provide intelligent, conversational customer service, powered by the latest advancements in natural language processing and machine learning from frameworks like PyTorch and TensorFlow. This chatbot significantly improved customer interaction and operational efficiency.				
4. Experience				
Organization Name	Duration	Job Title	Technology/ Language Used	Responsibilities Includes
Address	(mm/yyyy) - (mm/yyyy)			

Deep Mind Labs Limited	19/1/2024	AI Architect	• AI Transformation Catalyst • Computer Vision Virtuoso • Strategic AI Alchemist • Cross-Functional Collaborator • AI Advocate & Educator • Machine Learning Maverick • Team Whisperer • Ethical AI Evangelist • Tech Trailblazer • AI Luminary	AI Model Enhancement: Continuously improve AI models in Linear Regression, Logic Regression, and Neural Networks to increase accuracy and efficiency. Computer Vision Optimization: Regularly fine-tune computer vision systems using OpenCV and Roboflow to reduce false positives and enhance object recognition. Strategic AI Planning: Develop and execute AI strategies on an ongoing basis to drive cost reduction and productivity improvements across the organization. Collaboration Maestro: Collaborate daily with cross-functional teams, including data scientists, engineers, and domain experts, to seamlessly integrate AI technologies into business processes. AI Culture Advocate: Foster a data-driven culture by promoting AI literacy and ensuring teams can effectively use AI tools in their daily work. ML Pipeline Management: Oversee the maintenance and optimization of custom machine learning pipelines, ensuring efficient data preprocessing and model deployment. Team Leadership: Lead and mentor the AI engineering team, guiding daily activities to maximize productivity and successful project execution. Ethical AI Implementation: Uphold ethical AI practices in the development and deployment of models,
------------------------	-----------	--------------	--	---

				ensuring transparency and alignment with regulations. Technology Selection: Continually evaluate and select AI technologies and tools like TensorFlow, PyTorch, and scikit-learn to stay at the forefront of AI advancements. AI Research and Innovation: Dedicate time to AI research and development, which includes publishing papers and presenting findings at conferences, to maintain the organization's reputation as a leader in AI innovation.
Deshifarmer	04/2022 - 03/2023	Chief Technology Officer	- Machine Learning - PyTorch, - TensorFlow, - Generative AI	Developing technical aspects of the company's strategy, discovering and implementing new technologies, supervising system infrastructure, building quality assurance and data protection processes, monitoring KPIs and IT budgets, and aligning technology resources with the organization's goals.
belivIT (Omicon Group)	06/2021 - 01/2022	Senior Data Scientist	- Python - Pandas - NumPy - Seaborn - SciPy - Matplotlib - Scikit-learn - NLTK, PyTorch, TensorFlow	Providing architectural leadership, participating in data mining, creating ecosystem models, automating data transformation, conducting studies, using advanced data mining and statistical modelling techniques, developing predictive models, and utilizing machine learning algorithms.
Abdulaziz Oil & Gas	01/2020 - 07/2021	DIRECTOR IT (Remote)	IT Infrastructure, Security, Communication Systems	Overseeing IT operations and supervise systems and IT staff, developing strategy as it relates to the organization's IT infrastructure, developing, managing, and tracking the IT department's annual budget, consulting senior-level stakeholders, ensuring smooth delivery and operation of IT services, creating processes and standards for selection, implementation, and support

				of systems, providing direction, guidance, and training to IT staff.
Nagad	July 2019 – December 2019	Head of Software	- Version Control Systems: Git, SVN - Integrated Development Environments: Visual Studio, Eclipse, IntelliJ IDEA - Project Management Tools: Jira, Trello, Asana - Continuous Integration/Continuous Deployment (CI/CD) Tools: Jenkins, Travis CI, CircleCI - Unit Testing Frameworks: JUnit, TestNG, Mocha - Database Management Systems: MySQL, PostgreSQL, MongoDB - Cloud Platforms: AWS, Google Cloud, Azure - Code Review Tools: Gerrit, CodeClimate, SonarQube - Containerization and Orchestration Tools: Docker, Kubernetes - Performance Monitoring Tools: New Relic, Datadog, AppDynamics	Lead software development team to develop, document, and maintain cutting-edge web-based applications. Develop and manage software engineering applications utilizing standard development tools. Provide technical consultation as well as expertise to Product Managers.
Jadroot Group	July 15, 2018 – March 24, 2019	Director IT	- MySQL - Cloud technologies - PHP (Laravel)	Design Database and System Architect for Jadroot Ecommerce. Plan and conduct sprint meetings. Install and maintain local web server, review code and database security.
Flipkart	December 8, 2015 – May 8, 2018	VP Software Engineering	- TensorFlow or PyTorch: For building and training machine learning models. - Scikit-learn: For traditional algorithms	Enhanced on-time deliverability and launched an intranet dashboard hub for project tracking. Advocated for corporate culture change and grew the software team

			focused on data mining and data analysis. - Machine Learning Algorithms for Fraud Detection: Employing anomaly detection, predictive modeling, and neural networks to enhance fraud detection systems. - Machine Learning Algorithms for Personalization: Using recommendation systems and other predictive algorithms to personalize the shopping experience based on user behavior and preferences.	significantly Developed systems for fraud detection and managed key stakeholder relationships.
Reliance Jio Infocomm Limited (Rjil)	June 18, 2016 – March 25, 2018		- Cloud technologies - Big Data	Led architectural development and implementation of cloud strategy. Managed application development, business intelligence, and business analysis teams. Reduced content time-to-market significantly by implementing Service Oriented Architecture (SOA).
Trilog Group	December 8, 2012 - August 5, 2015	CTO SOFTWARE PRODUCT DEVELOPMENT PROJECT MANAGEMENT	.NET Framework	Improved productivity and employee engagement through organizational changes and SDLC improvement. Escaped significant financial impact by transforming a product with low client satisfaction into a flagship product. Launched and steered development of a .NET framework reducing new product time-to-market.

Marketing Pro-Junction Ltd	April 7, 2009 - October 19, 2012	Director Software	- Agile methodologies - PMI management tools	Overhauled technical project management group and introduced new project planning and tracking methodologies. Instituted earned value management system and project management QA dashboards. Conceptualized and implemented project management and QA dashboards.
Documenta Ltd	March 7, 2007 - January 19, 2009	Principal Architect		Designing system architecture for various projects, developing architectural solutions to best meet business needs, maintaining architectural documentations
Divine IT Ltd	May 7, 2004 - January 23, 2007	Lead Software Developer	- UML - XSLT - JSF (MVC) - SAX and DOM parsers - Apache POI-HSSF - iText	Analyzing requirements and designing class diagrams using UML, developing UI screens and business layer logic, maintaining the Production and Test systems
PRO-VISION Inc	February 6, 2001 - December 29, 2003	.Net Developer	.Net development framework - C#	Developing new software solutions, providing technical assistance for existing database structures, maintaining detailed technical documentation for application systems
QuntamCloud LTD	March 15, 2000 - December 30, 2000	PHP Developer	- PHP - MySQL	Building PHP websites, conducting cross-browser usability testing, developing advanced database-driven websites and systems

5. Language Skills

	English	Japanese
Read	B	
Write	B	
Talk	B	
Skill Level	A = Native B = Fluent	C = Functional D = Basic

7. Project History

My Database Design 1: - <https://www.linkedin.com/feed/update/urn:li:activity:7320472348778729474/>

Programming Languages & Frameworks

- Python
 - Streamlit - An open-source app framework for Machine Learning and Data Science teams.
 - FastAPI - A modern, fast (high-performance) web framework for building APIs with Python 3.7+ based on standard Python type hints.
 - Flask - A lightweight WSGI web application framework, easy to get started with a simple core for web applications.
- GoLang (Golang Web Frameworks)
 - Gin - A web framework written in Go (Golang). It features a Martini-like API with much better performance.
 - Gorilla Mux - A powerful URL router and dispatcher for golang.
 - Beego - An open-source, high-performance web framework for the Go programming language.
 - Echo - A high performance, extensible, minimalist Go web framework.
- Rust
 - A language empowering everyone to build reliable and efficient software.

Databases

- MySQL
- PostgreSQL
- MongoDB

Md. Shakil Uddin Rony (KillerCoder)

- Microsoft SQL Server
- Oracle Database

Machine Learning Techniques

- Predictive Analytics
- Fraud Detection Mechanisms
- Personalized Customer Engagement
- Predictive Inventory Management
- Predictive Modeling

Deep Learning Models

- TensorFlow - An open-source software library for dataflow and differentiable programming across a range of tasks. It is a symbolic math library and is also used for machine learning applications such as neural networks.
- PyTorch - An open-source machine learning library based on the Torch library, used for applications such as computer vision and natural language processing, primarily developed by Facebook's AI Research lab.
- Keras - An open-source software library that provides a Python interface for artificial neural networks. Keras acts as an interface for the TensorFlow library.
- Caffe - A deep learning framework made with expression, speed, and modularity in mind. It is developed by the Berkeley Vision and Learning Center (BVLC) and community contributors.

Md. Shakil Uddin Rony (KillerCoder)

- Microsoft Cognitive Toolkit (CNTK) - Also known as the Microsoft Cognitive Toolkit, it is a deep learning framework developed by Microsoft Research. CNTK describes neural networks as a series of computational steps via a directed graph.
- Theano - A Python library that allows you to define, optimize, and evaluate mathematical expressions, especially ones with multi-dimensional arrays (numpy.ndarray). Theano has been in the deep learning field for a long time but is less actively developed currently.
- MXNet - A deep learning framework designed for both efficiency and flexibility. It allows you to mix symbolic and imperative programming to maximize efficiency and productivity.
- Chainer - A Python-based deep learning framework aiming at flexibility. It provides automatic differentiation APIs based on the define-by-run approach (a.k.a. dynamic computational graphs) as well as object-oriented high-level APIs to build and train neural networks.
- DL4J (DeepLearning4j) - A deep learning programming library written for Java and Scala and a computing framework with wide support for deep learning algorithms.
- PaddlePaddle - PArallel Distributed Deep LEarning: Baidu's open-source platform, designed to be easy to use and efficient for deep learning tasks.

Total Year of Experience: - 21 Years
