Career Summary

Highly motivated and results-driven CS-MIS Automation Developer with over 2 years of professional experience in software development, business automation, and data-driven solutions. Skilled in PHP (Laravel), SQL, and enterprise-level reporting systems, with a strong focus on process optimization and digital transformation.

Experience

Software Engineer, PRAN-RFL Group – Dhaka, Bangladesh Sept 2023 – Present

- Designed and developed a fully customized CRM system to streamline customer complaint registration, tracking, and resolution, with integrated features for telesales agent performance monitoring, quality control (QC), and call recording logs.
- Implemented specific workflows for the resolution of ticket issues in business units, allowing service teams to log complaints efficiently, categorize issues, assign tasks to relevant departments and monitor the resolution status according to the unique logic and operational needs of each business unit, resulting in better customer satisfaction and faster response times.
- Implemented Typesense for vector-based and semantic search functionality within an advanced FAQ system, enabling users to retrieve more accurate and contextually relevant answers based on queries from natural language.
- Developed and integrated a real-time rider tracking feature, allowing customer service teams to monitor the live location of delivery personnel, improving delivery transparency and coordination.
- Optimized database performance by implementing indexing strategies for large datasets, significantly improving the speed and efficiency of data export, import and search operations within the application.
- Implemented CI/CD pipelines using Jenkins for deployment processes to ensure faster and more reliable delivery of application updates.
- Used Docker to run services like databases, Redis Queue, and MongoDB.

Associate Software Engineer, Olivine Limited – Dhaka, Bangladesh Jan 2023 – Aug 2023

- Developed and maintained multiple Laravel-based web applications, including HRIS and inventory systems, by translating Figma mockups into fully responsive front-end interfaces using JavaScript and Blade.
- Implemented full-stack features across client projects with MySQL backend integration, emphasizing usability, performance, and modular design.
- Delivered optimized solutions by closely collaborating with clients, ensuring accurate functionality and adherence to project requirements.

Software Engineer, Intern, Bengla Software Limited – Dhaka, Bangladesh Jun 2022 – Dec 2022

- Assisted in developing and debugging web applications using HTML, CSS, JavaScript, and backend technologies.
- Collaborated with the team to implement responsive UI components and improve user experience.
- Participated in testing and resolving bugs to ensure cross-browser compatibility and performance optimization.

Education

American International University-Bangladesh, B.Sc. in Computer Science Jan 2019 – Dec 2022

- GPA: 3.8/4.0
- **Coursework:** Computer Architecture, Comparison of Learning Algorithms, Computational Theory, Web Development, Software Architecture

Publications

A Review of Commonly used Machine Learning Classifiers in Heart Disease Prediction

Dec 2022

Alimul Mahfuz Tushar, Abdul Wazed, Ezsanuzzaman Shawon

10.1109/ICSPC55597.2022.10001742

Projects

Customer Relationship Management

- Developed a CRM software managing both user tickets and telesales, handling thousands of tickets daily and supporting over 800 agents.
- Implemented features for agent monitoring, performance tracking, and sales growth analysis within the CRM.
- Integrated the CRM with external systems such as SPRO, Service Software, Othoba.com, and e-commerce platforms for seamless data exchange.
- Utilized RabbitMQ, MySQL, MongoDB for messaging, data storage, and high availability.
- Implemented role and permission management, job queues, automated emails, report generation, bulk upload/export functionalities.
- Employed Jenkins for automated deployment pipelines and optimized database queries for improved performance.
- Tools Used: PHP, Laravel, JavaScript, MySQL, MongoDB, Redis, RabbitMQ

RFL-Care

RFL-Care

- Developed backend services for the RFL Care app, which rewards dealers, retailers, and plumbers with points by scanning QR codes on product labels.
- Implemented features allowing users to redeem points for gift products within the app or through Bkash cash-outs, ensuring seamless transaction flows.
- Secured the API using JWT-based authentication and authorization mechanisms to protect user data and transactions.
- Integrated Firebase services to enable real-time chat functionality and push notifications, enhancing user engagement and communication.
- Tools Used: PHP, Laravel, MySQL, JWT, Firebase

Olivine Aborad

olivineabroad.com

- Developed a full-stack web application using PHP (Laravel) for managing immigration document submissions and tracking processes.
- Implemented features for students to submit their immigration-related files, including student visa documents and GCMS file requests for Canada.
- Designed a secure file management and tracking system, enabling users to monitor the progress and status of their applications in real-time.
- Tools Used: PHP, Laravel, MySQL, JQuery

Technologies

Languages: PHP, C#, Java, C++

Technologies: Laravel, Symfony, MySQL, MongoDB, Nginx, Apache, Redis, RabbitMQ
