Professional Experience (5+ YoE)

Brain Station 23 x BanglaLink

04/2022 – present

Senior Software Engineer, Java | Backend | DevOps

- **Infrastructure Management:** Designed, developed, and managed large-scale middleware systems powering Banglalink's MyBL app (**4K+ RPS, ~2M DAU, ~45M requests/day**) with **99.99% availability**.
- **Kafka Cluster** Management: Built and secured production-grade Kafka clusters with DR setup and integrated observability (Otel, Prometheus, Grafana); ensured high reliability as sole manager and shared expertise with the team.
- Engineered and deployed **Nginx as an API Gateway**; led production upgrades including DC-DR decoupling, SSL termination, HTTP/2 support, performance and socket tuning, health checks, and active-passive sync—resulting in lower latency, improved resiliency and observability, reduced node hops, 3x fewer sockets, and lower operational costs.
- Revamped legacy reporting, reducing report generation time by more than **200x**.
- Mentored junior team members during onboarding and through **knowledge-sharing** sessions on system know-how, team conventions, Kafka, and Nginx management—effectively **upskilling** the team and **reducing single points** of dependency.

CS Infotech Ltd

07/2020 – 03/2022

Software Engineer

- Developed **banking applications** such as Loan Management System and Collection Monitoring and Recovery System using Spring boot and VueJS.
- Migrated monoliths to microservices, designed and implemented secure RESTful APIs, and mitigated security vulnerabilities.

Education

B.Sc. in CSE | Southeast University | 2015 – 2020 | CGPA: 3.27/4.00

Skills

Backend: Java, Spring Boot, REST APIs, Microservices, OAuth2/JWT, MySQL, ClickHouse

DevOps: Nginx, Git, Grafana, Prometheus, Scripting, Docker, Kubernetes (preparing for CKA), CI/CD

Messaging: Apache Kafka, Event-driven Architecture

Cloud & Infrastructure: GCP (familiar), API Gateways, Load Balancing, HA Architecture

Competitive Programming

- ACM ICPC Dhaka Site Regional 2018, 2019
- Solved 1500+ Programming Problems
- Programming contest trainer at Southeast University (2017-2019)
